ARO-Mentoring-Day 2026

- Information for sponsors -

Event overview

The ARO-Mentoring-Day aims to support young scientists in the creation and implementation of study protocols in the field of radiation oncology. After a general introduction to regulatory, organisational and biostatistical aspects of radiation oncology studies, participants receive intensive coaching on how to implement their submitted study protocol ideas. This includes one-to-one mentoring and statistical advice.

A two-day-in-person event in Berlin will be followed by an online follow-up phase. The programme is aimed at assistant doctors and young specialists in radiation oncology, as well as medical physicists and radiation biologists.

Participants have the opportunity to apply for the "ARO-Studienpreis" with the protocol they have developed. Upon successful completion, the protocols receive the "ARO-Studiensiegel".

What are we looking for?

The participants in the 2026 Mentoring programme are medical doctors, scientists, medical physicists and experts in the field of radiation oncology. In order to ensure the long-term quality of this programme for young talents, we are looking for reliable partners to support us in financing the ARO-Mentoring-Day through annual sponsorship.

What do we have to offer?

As a sponsor of the Mentoring-Day 2026, you will have the opportunity to present yourself to a highly qualified professional audience and position your company as an important partner in the field of radiation oncology and radiotherapy.
